Sustainable Tourism

Bike and Train

One of the many benefits of cycle tourism is that it typically has very little impact on the environment. What impact it does have can be reduced even further if you travel to and from your cycle trip by public transport.

Taking your bike to your destination by train is the ideal combination for environmentally friendly mobility in both short and long distance traffic. Most locations in Europe are accessible by train and by booking in advance you may be able to find some cheaper fares. Many towns are now equipped with special bicycle areas but not all, so it is best to check with the rail operator before your journey. See also if you need to make reservations.

Some of the best websites for planning a train journey with your bike are:

- Deutsche Bahn: www.bahn.de
- Schweizer Bundesbahnen: www.sbb.ch
- Société nationale des chemins de fer français (SNCF): www.sncf.com
