# What makes Park4SUMP unique?

A game changer for urban mobility, by strategically integrating high quality parking management into Sustainable Urban Mobility Planning (SUMPs)

2017-2022

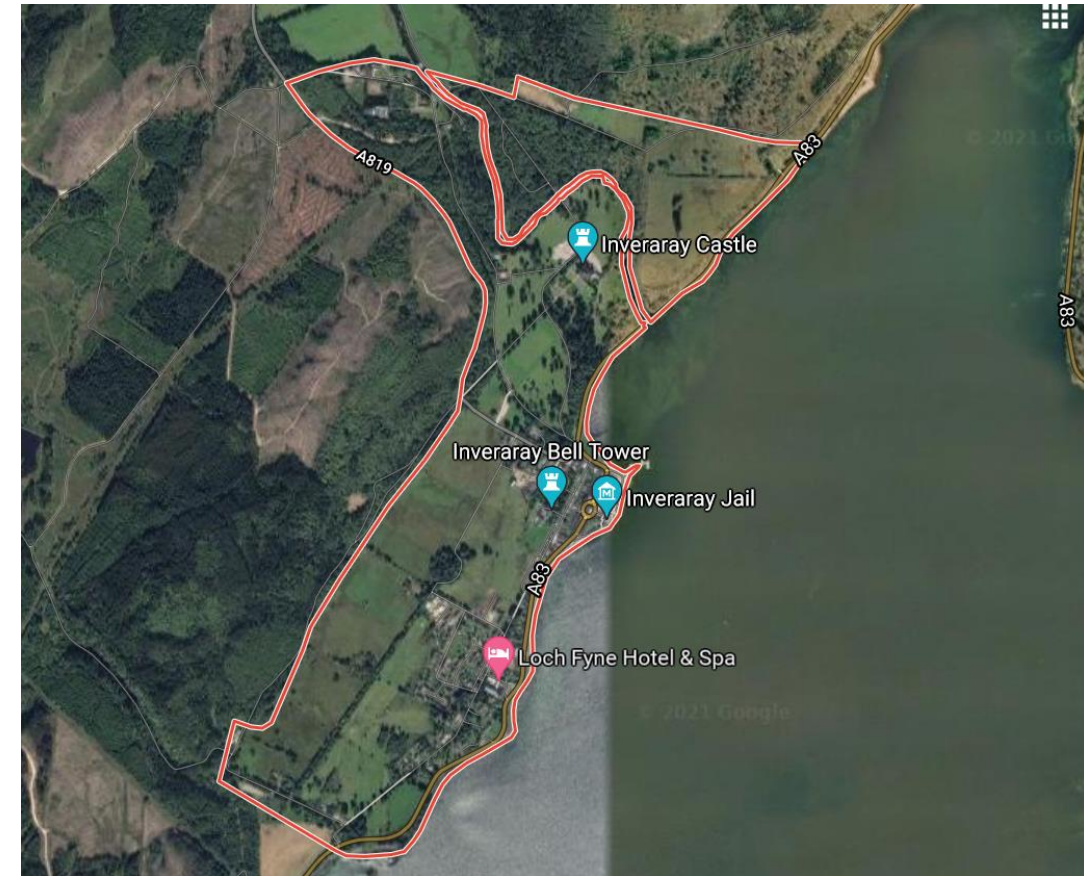

# Why parking management?

It's effective – results from on-street parking management in Munich

# Why parking management?

- Relevant to small towns and tourist areas
- Improves quality of environment in key areas e.g. promenades, beaches, parks
- Visitor experience improved if parking easy to find, organised
- Prices, scale of management can vary by season

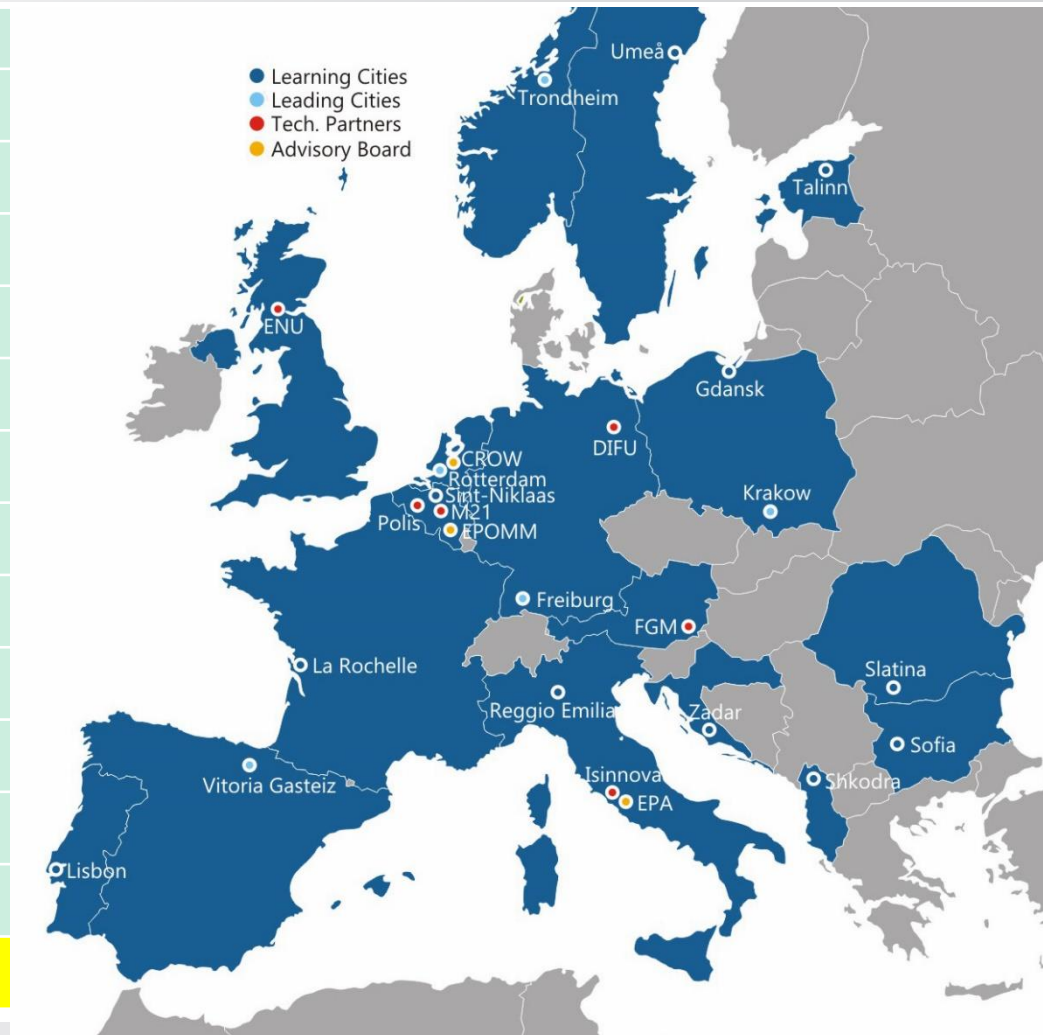

# General project concept

- Raising **awareness** and gaining **acceptance** on how the ‘right parking policies’ can help cities
  - ✓ Moving from a reactive to strategic parking policy
  - ✓ Integrate parking management into SUMP
- Building **capacity**, esp. where parking management not much used
- **Implementing** new and more parking measures for cities
- Stimulating further **innovation** in parking management
- Delivering **behaviour change** whilst generating revenues

# ParkPAD tool developed and used in each partner city

- review parking policies
- achieve consensus on improvements
- develop action plan

Cities that have done it found it helped:

- Benchmark against best practice
- Get new ideas
- Raise political status of parking
- Have time to review achievements
- Support other policies

**More ParkPAD cities needed!**
