## Dimensions and weight of selected vehicle models and their predecessors

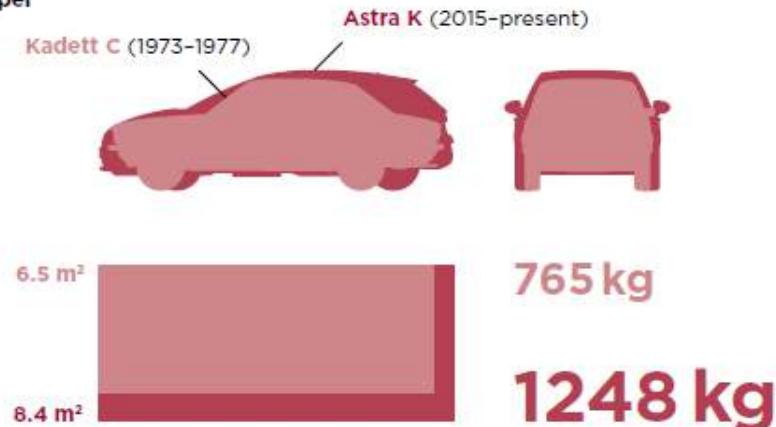

VW

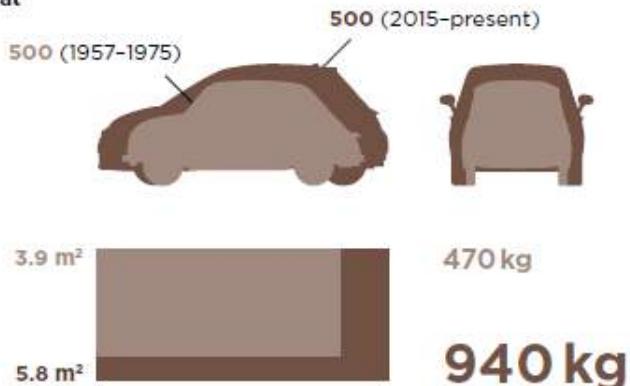

BMW

Opel

Flat

Today's vehicle models are much heavier than their predecessors. The Fiat 500 today, for example, weighs twice as much as the same vehicle model sold in the 1960s and 1970s. Underlying reasons include the fact that modern vehicles have more safety but also entertainment equipment on board. The size of vehicle models has also increased over time, however to a lesser degree than weight.

### Diesel cars: Nitrogen oxide ( $\text{NO}_x$ ) emissions (in g/km)

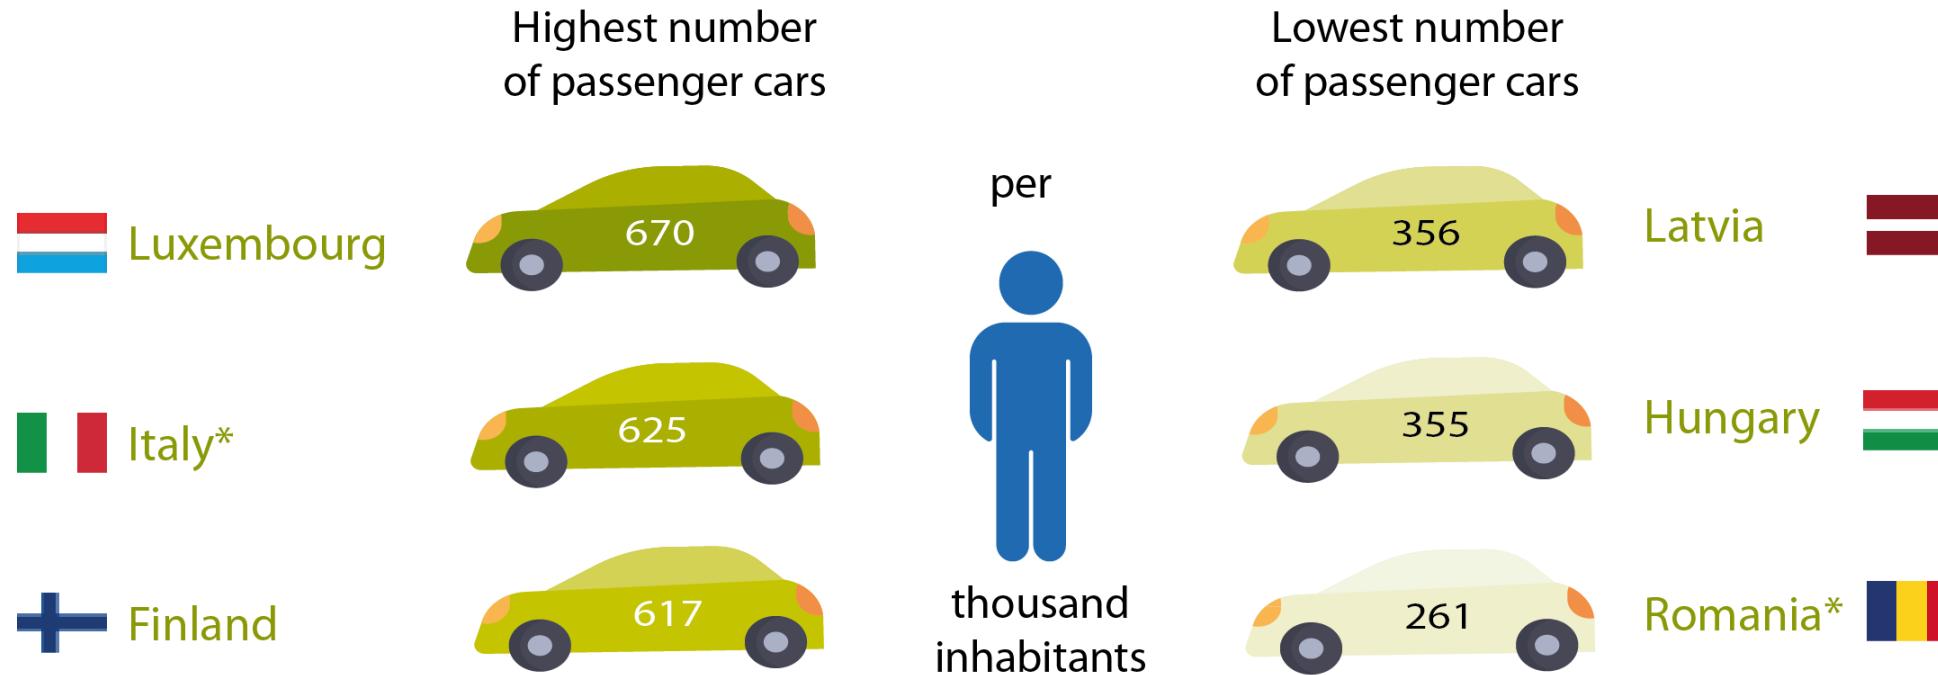

### Gasoline cars: Nitrogen oxide ( $\text{NO}_x$ ) emissions (in g/km)

Nitrogen oxide ( $\text{NO}_x$ ) emission limits for new diesel cars dropped from 0.5 g/km in 2000 to 0.08 g/km in 2014. However, recent data from on-road Remote Sensing confirms that for real-world driving conditions,  $\text{NO}_x$  emissions decreased much slower than originally expected. Real-world  $\text{NO}_x$  emissions for gasoline cars are significantly lower and decreased in line with the emission limits.

# EU Member States with the highest and lowest number of passenger cars per thousand inhabitants, 2017

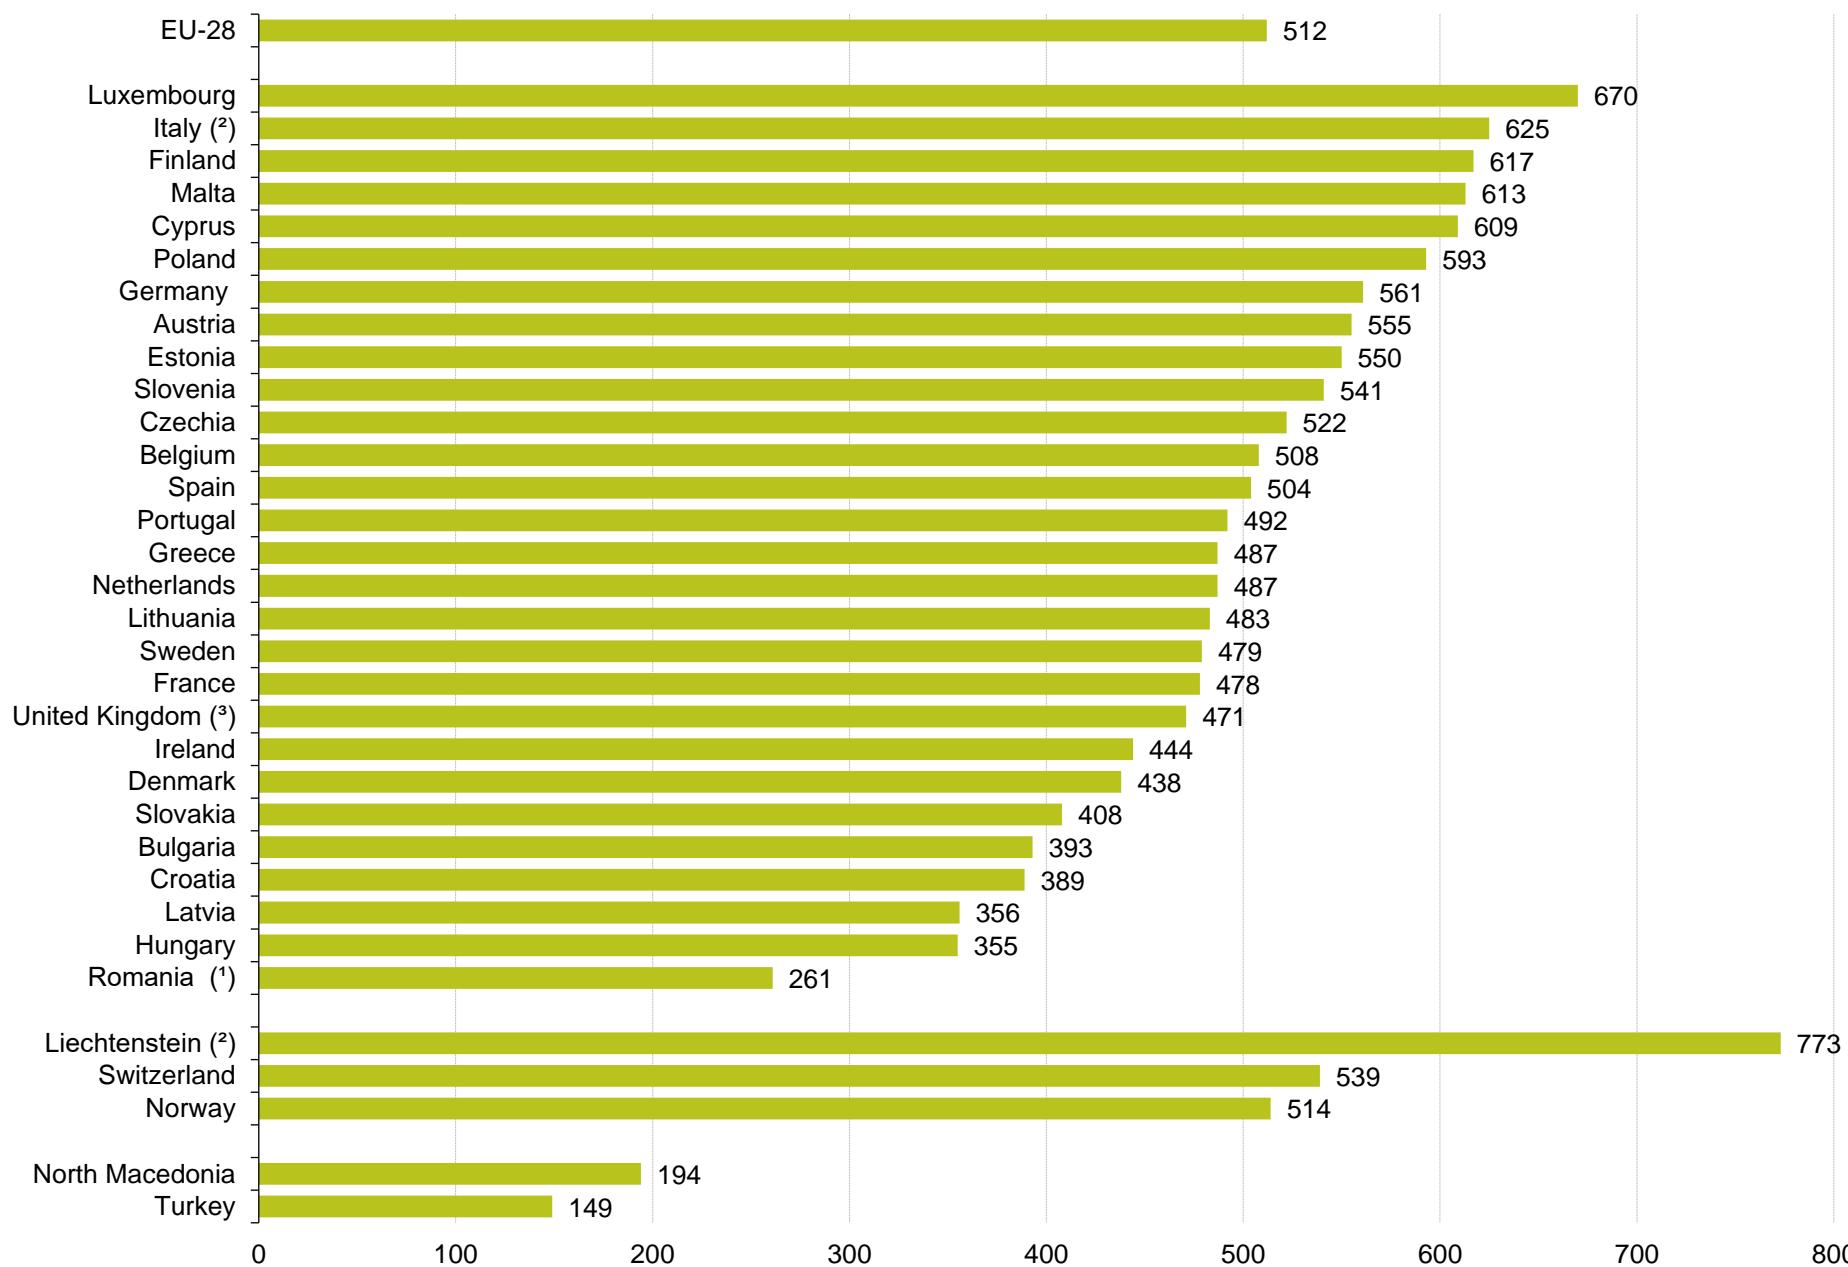

\*Italy: 2016 data; Romania: 2015 data.

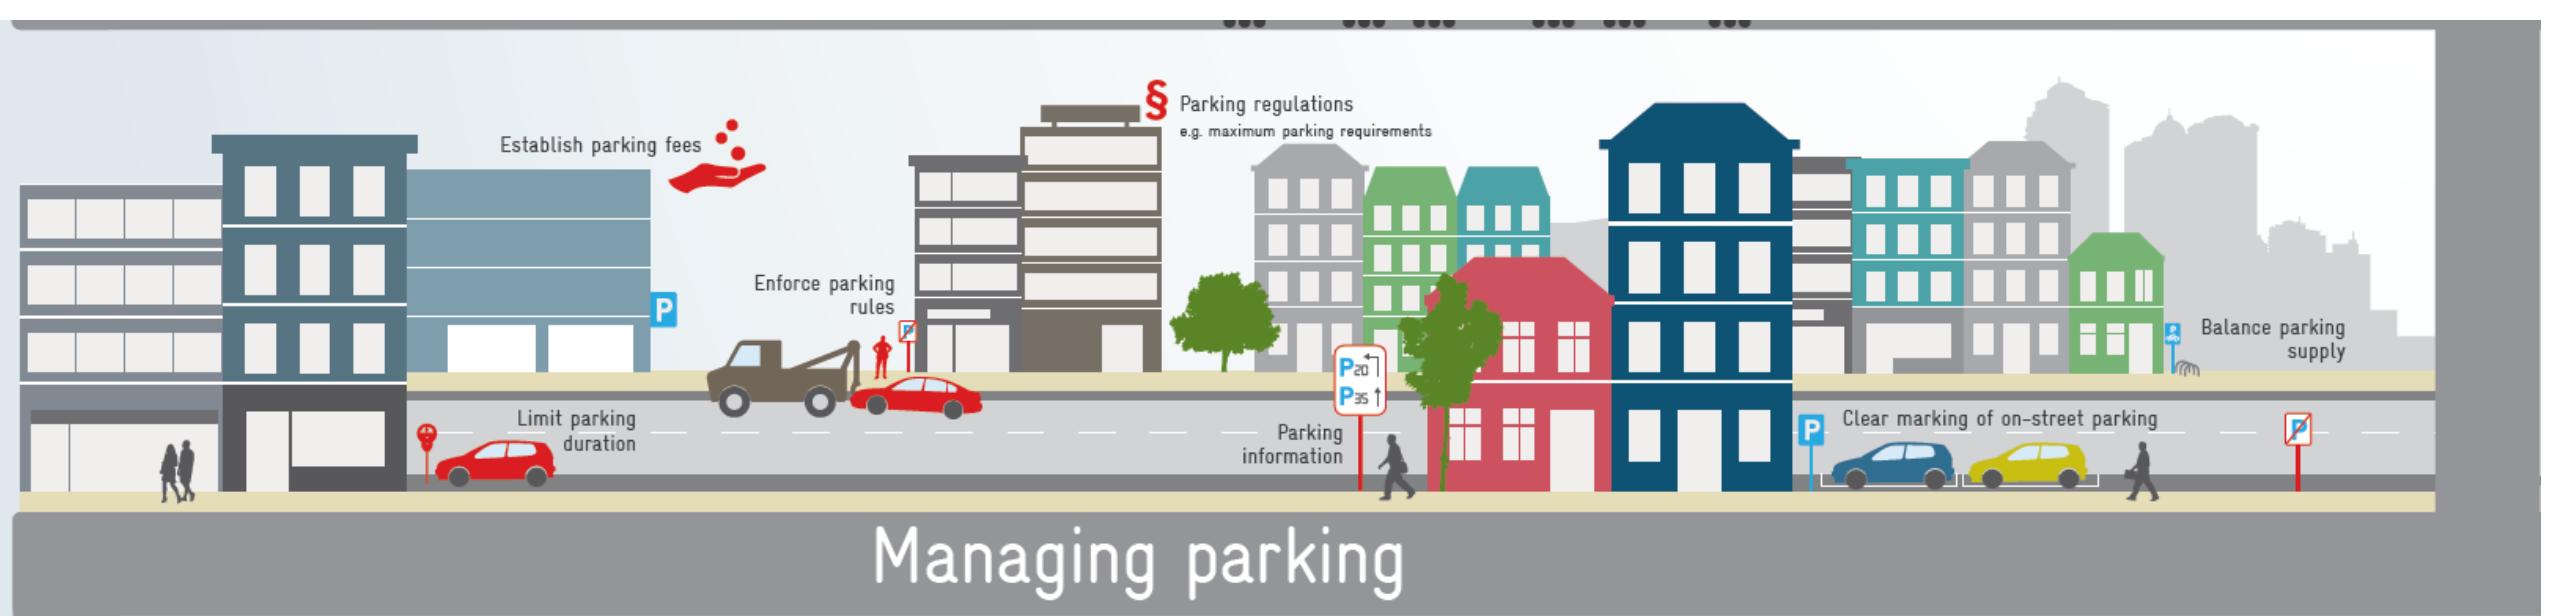

eurostat

HR-389 – (2017.)

## Number of passenger cars per thousand inhabitants, 2017

The legal  
framework for  
making on-  
street parking  
restrictions and  
charging for on-  
street parking

- According to the Road Traffic Safety Law - Article 5, paragraph 1, item 6 and paragraph 11 - **local self-government units (cities and municipalities)**, in accordance with the provisions of the said Law, with the prior consent of the ministry of internal affairs, **regulate traffic in their area** by determining: parking areas and way of parking, parking bans and restricted parking spaces.

- Supervision of vehicle parking in places where parking is limited in time is performed by legal entities designated by local self-government units (e.g. Zagrebparking).
- **Local self-governments as owners of land have the right to organize parking fees at these locations and legal acts regulating the same.**
- Such legal acts must define the rights and obligations of all participants in the process and they must be harmonized with the Constitution and Laws of the Republic of Croatia and follow the examples of good practice of European cities.

legal entities designated by local self-government units could be:

- own company (ZG, ZD, SK ...)
- or concession (OS, KA, VŽ ...).

- There are no limits on the maximum charge per hour
- e.g. Dubrovnik, 10 eur/h

- is it legal to charge different rates for a resident's permit depending on the number of permits held by a household – **yes, but is not implemented**
- Zagreb - the exception is for privileged users of the Tuškanac garage (max 200 of them) is that they can buy one privileged ticket per housing unit.
- **small businesses can get parking permits.** The prices of such tickets in Zagreb are more expensive than the privileged ones and cheaper than the tickets for those users who do not live in the toll zone.

# The legal framework for enforcing different types of parking offence

Supervision of improperly parked vehicles was the responsibility of the police, and since 2004 the Road Traffic Safety Law has determined that the representative body of a local and self-government unit with the ministry of internal affairs may, among other things, perform the following tasks:

- supervision and relocation stopped and parked cars,
- traffic management,
- traffic monitoring in calm and pedestrian zones,
- detection of violations of pedestrians and cyclists,
- measuring the speed of cars in populated areas with fixed measuring devices,
- monitoring of tractors, carts and vehicles entering the road from the construction site.

- Therefore, Croatian legislation, based on the provisions of the Road Traffic Safety Law, enabled local and regional self-government units to regulate traffic in their area under certain prescribed conditions.
- In Zagreb, **the traffic and communal police**, which, among other things, supervises improperly parked vehicles and issues fines and warrants for moving vehicles.

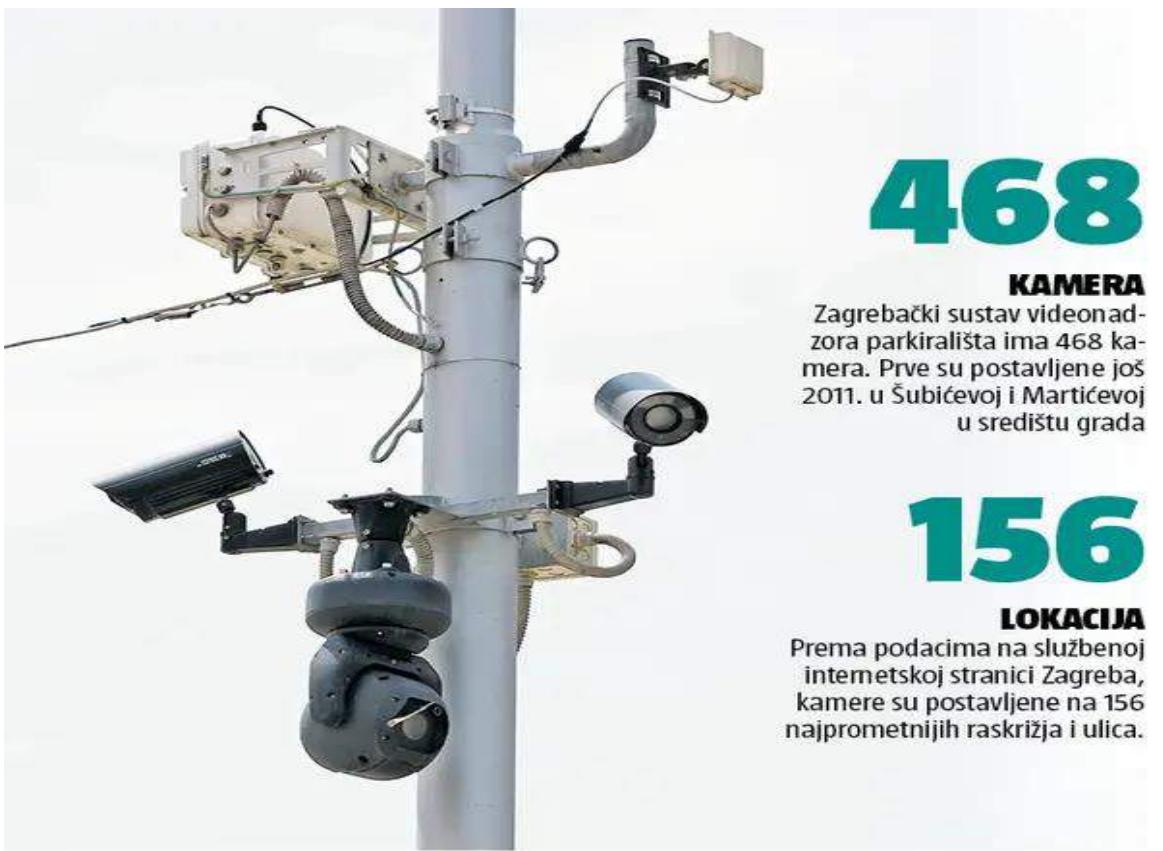

- The relocation service is performed by the Zagreb parking, which has 16 special "spider" vehicles.
- In order for improperly parked cars to be moved, it is **necessary for an authorized person** (the ministry of internal affairs/traffic or communal police) **to determine the type of violation according** to the legal provision and to issue a transfer order.
- Only after the transfer order has been **approved** the vehicle can be transferred.

- Due to the acceleration of the process of monitoring illegally parked vehicles, a "**video surveillance system**" has been developed that enables the crew of a special vehicle to spot an illegally parked vehicle in the field and send images to authorized persons at other locations for further action.
- In that way, work processes have been accelerated and **traffic is regulated more efficiently**.
- A number of cameras have been set up in Zagreb to monitor traffic at rest, which is used by traffic and communal police officers, among other things, to monitor improperly parked vehicles.

# 468

## KAMERA

Zagrebački sustav videonadzora parkirališta ima 468 kamera. Prve su postavljene još 2011. u Šubićevoj i Martićevoj u središtu grada

# 156

## LOKACIJA

Prema podacima na službenoj internetskoj stranici Zagreba, kamere su postavljene na 156 najprometnijih raskrižja i ulica.

# 180

## SEKUNDI

Zaustavljanje je prekid vožnje do tri minute ili 180 sekundi, a ako se stoji dulje, zakon to naziva parkiranjem.

# 300

## KUNA PUNA KAZNA

Za nepropisno zaustavljanje propisana je kazna od 300 kuna. U roku od tri dana može se platiti 'samo' 150 kuna.

# 25

## MILIJUNA KUNA

Toliko kazni zagrebačko prometno redarstvo naplatilo bi na godinu kad bi svaka kamera snimila samo jedno nepropisno zaustavljanje na dan.

## PROMETNI REDARI SMIJU PISATI KAZNE

Prema Zakonu o sigurnosti prometa, osim policije, nadzor nepropisno zaustavljenih i parkiranih vozila mogu obavljati i prometni redari. U Prekršajnom zakonu piše da se prekršaj utvrđuje i tehničkim uredajima.

The legal  
framework for  
any money  
raised from  
parking fines  
and charges

- where does it go ? – **for Zagreb we don't know...**

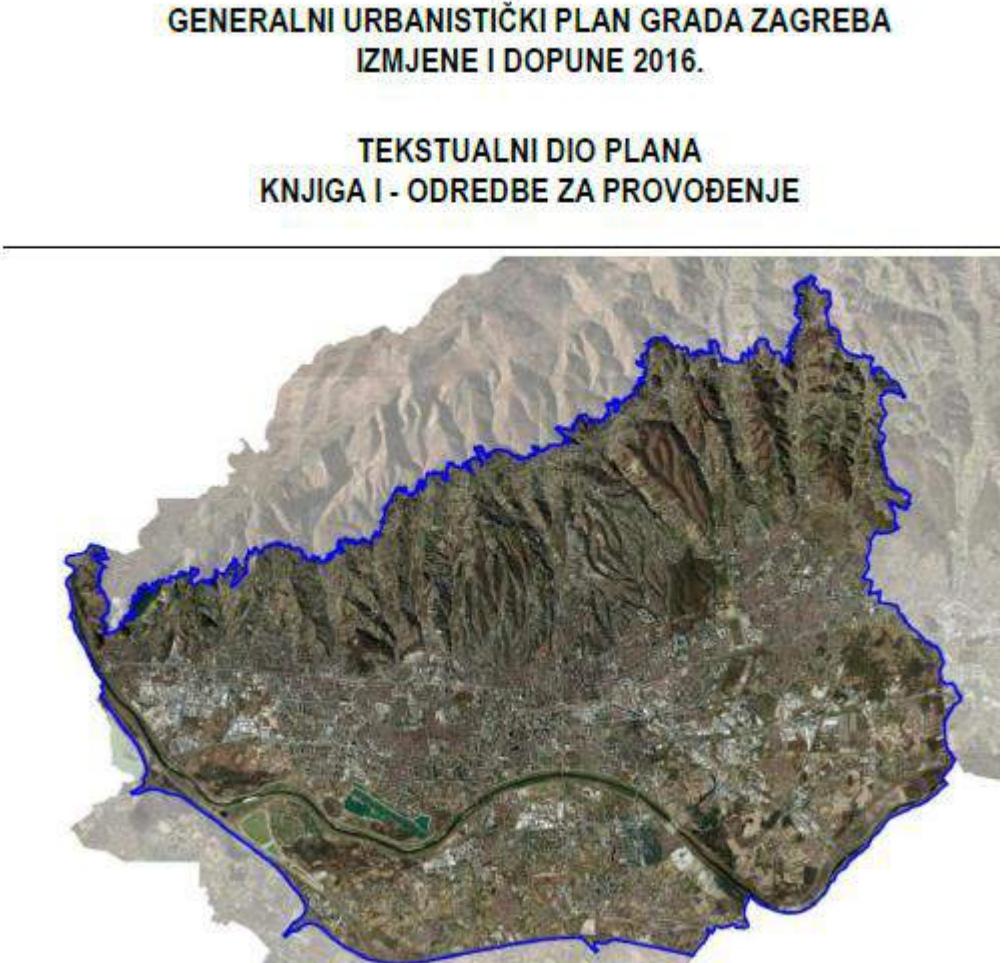

---

- what can it be spent on ? – similar like in Ghent

The legal framework for the number of parking spaces that can be provided with new buildings

# Private-public partnership in the construction of new public off-street parking

- we don't know for Zagreb...

# Good practice examples from Croatia

- Zagreb
- Osijek
- Sisak

# City legislative - Zagreb

- Organization and payment of parking in the city of Zagreb is based on the **Decision on Parking Organization and Payment Method** („Odluka o načinu i organizaciji naplate parkiranja“) and the **Ordinance on the Use of Public Parking Lots and Public Garages** („Pravilnik o korištenju javnih parkirališta i garaža“).
- The **Decision** and the **Ordinance** regulate the parking zones, parking time limitations, prices and methods of using parking permits, as well as other terms and conditions of organization and use of parking services.
- The city of Zagreb is divided into **four parking zones**, which include those with parking time limitation and zones or parts of zones with specially regulated system of payment for parking.
- When it comes to procuring parking permits, users of public parking lots and public garages may choose between various purchase options.

### **Parking control and collection time at public parking lots**

<b>Zone</b>	<b>Weekdays</b>	<b>Saturdays</b>	<b>Sundays and national holidays</b>
Zone I*	7:00 - 22:00	7:00 - 15:00	no collection
Zone I.1.	0:00 - 24:00	0:00 - 24:00	0:00 - 24:00
Zone I.2.	0:00 - 24:00	0:00 - 24:00	0:00 - 24:00
Zone II.1.	7:00 - 20:00	7:00 - 15:00	no collection
Zone II.1.**	7:00 - 19:00	7:00 - 15:00	no collection

Public garages	0:00 - 24:00	0:00 - 24:00	0:00 - 24:00

\* Exception: Dubravkin put is charged on weekdays, saturdays, sundays and national holidays from 7:00 to 24:00 hours.

\*\* Applicable only for Trg Stjepana Radića square.

\*\*\* During official fair events no fee is charged at parking lots in Zone II.2 and part of Zone IV.1 (Zagreb Fair - east, west).

\*\*\*\* Applicable only for Paromlin parking lot.

# Parking permits - types and prices

**Hourly parking permit**

**Commercial parking permit**

**Privileged parking permit**

**Daily parking permit**

**Disability parking permit label**

# Privileged parking permit

The right to purchase a privileged parking permit (PPP) belongs to tenants residing in streets within the zones where parking is charged, as well as legal persons, natural person, crafts and trades and persons who are self-employed in another activity and whose registered office or business premises they use are located within that area. A privileged parking permit is issued to customers who fulfil the prescribed requirements, for a period of 12 months at the most.

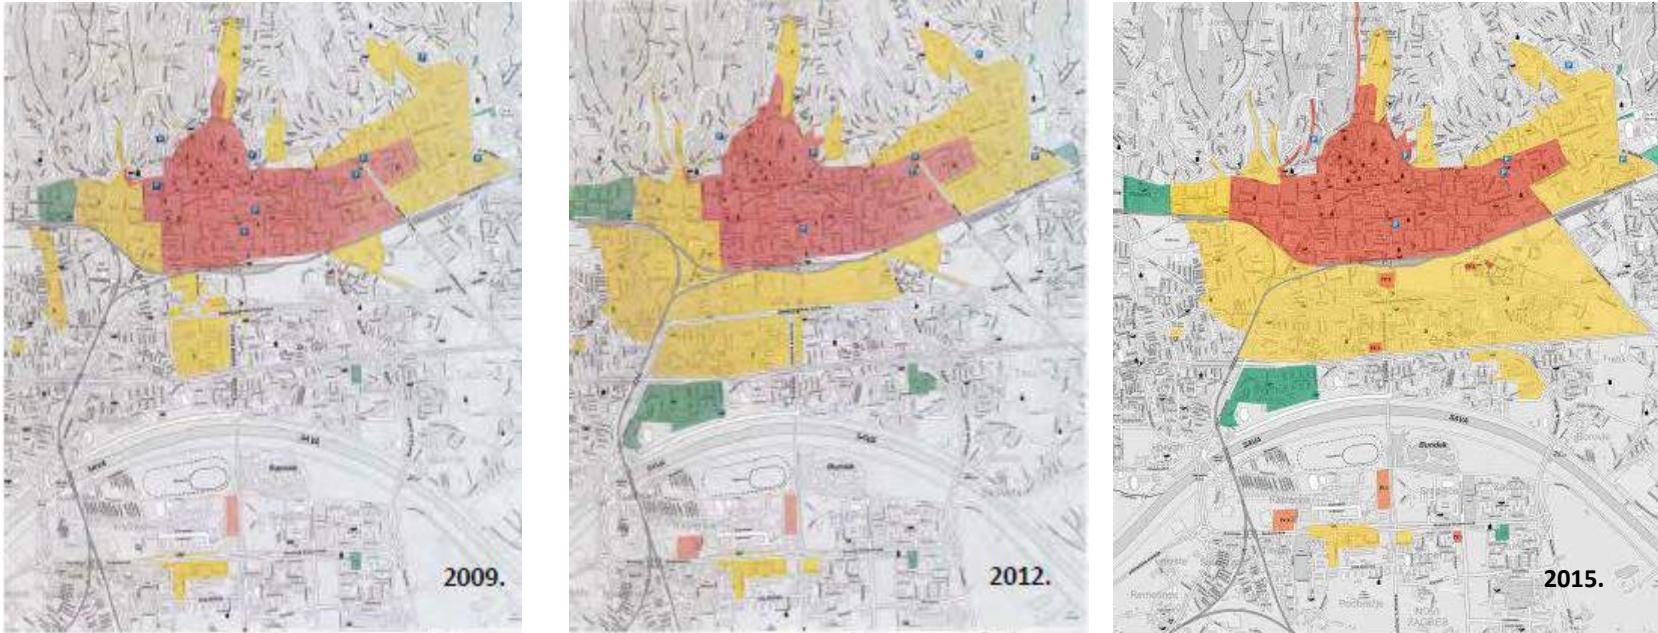

Privileged parking permits are not subject to parking time limitation.

A privileged parking permit is issued in an immaterialized form and it can be purchased at the cash desks of the Subsidiary, via the ePK Portal, via the new parking meters and via the ZgPark mobile application. When purchasing a parking permit via the ePK Portal, the service user receives a reminder of expiry of the parking time under the privileged parking permit five days before the actual expiry date\*\*.

A PPP for Zone I also applies to Zones II and III, whereas the PPP for Zone II also applies for Zone III. A PPP for Zone I.1 also applies to Zones I, II and III. A PPP does not apply in Zone I.2 or in Zones IV.1 and IV.2 (off-street public parking lots).

Zone	Privileged parking permit - monthly privileged parking permit		
	Natural persons	Craft and trades	Legal persons
	Tenants	Craft and trades	
Zone I	100,00 kn	250,00 kn	500,00 kn
Zone I.1.*	110,00 kn	/	/

# Parking zone naplate i javne garaže u središnjem dijelu grada ZG

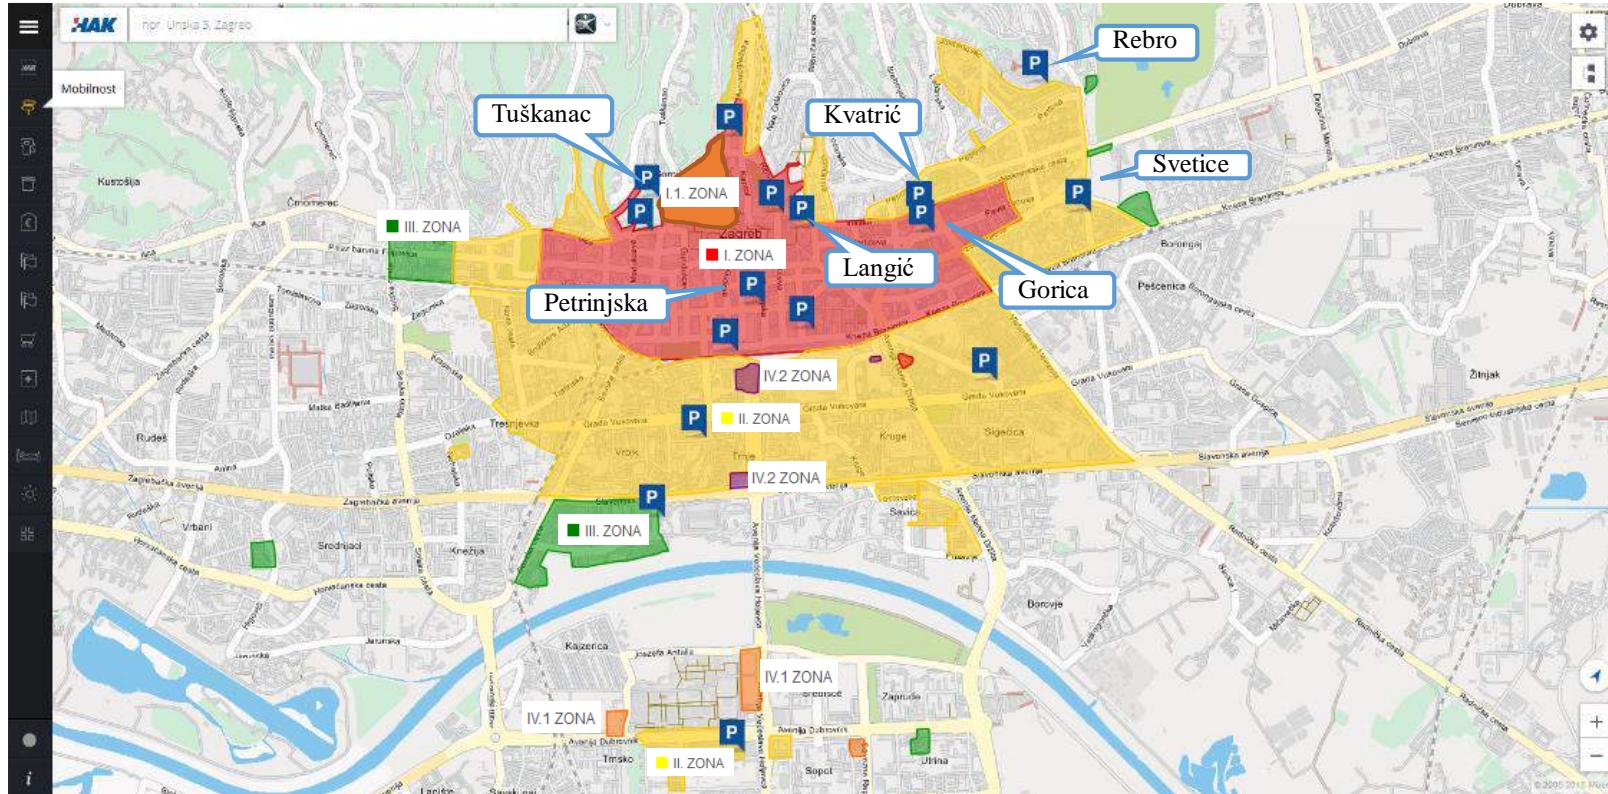

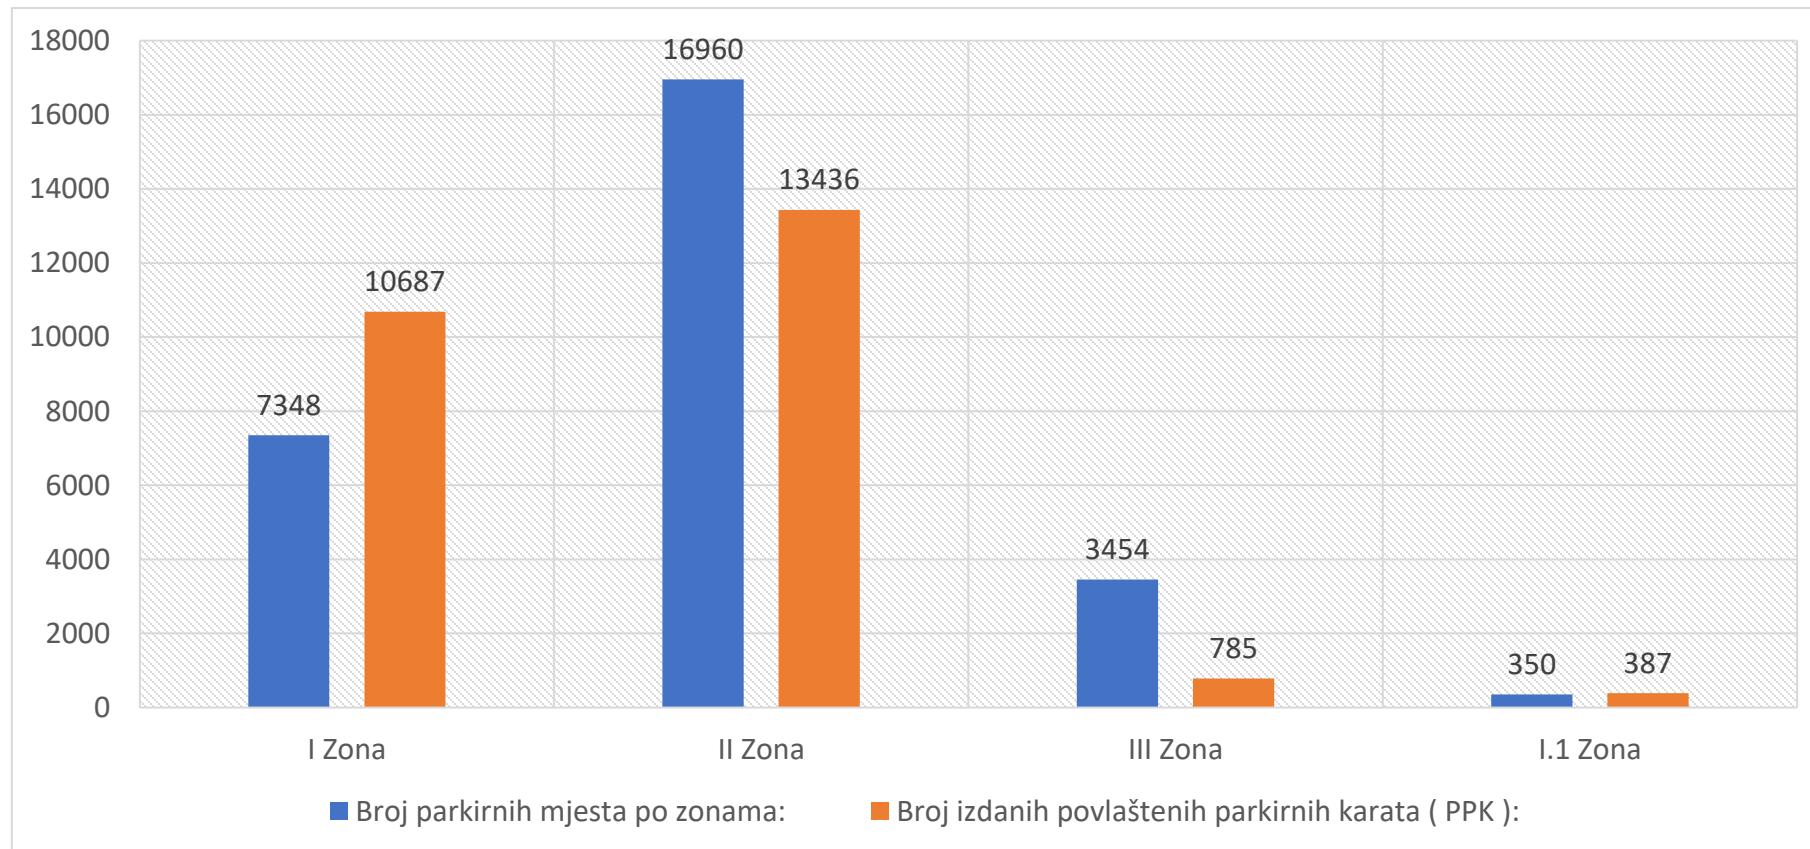

Figure 1. Parking zone naplate i javne garaže u središnjem dijelu grada Zagreba, 2015.

# Description of the parking problem in the City of Zagreb

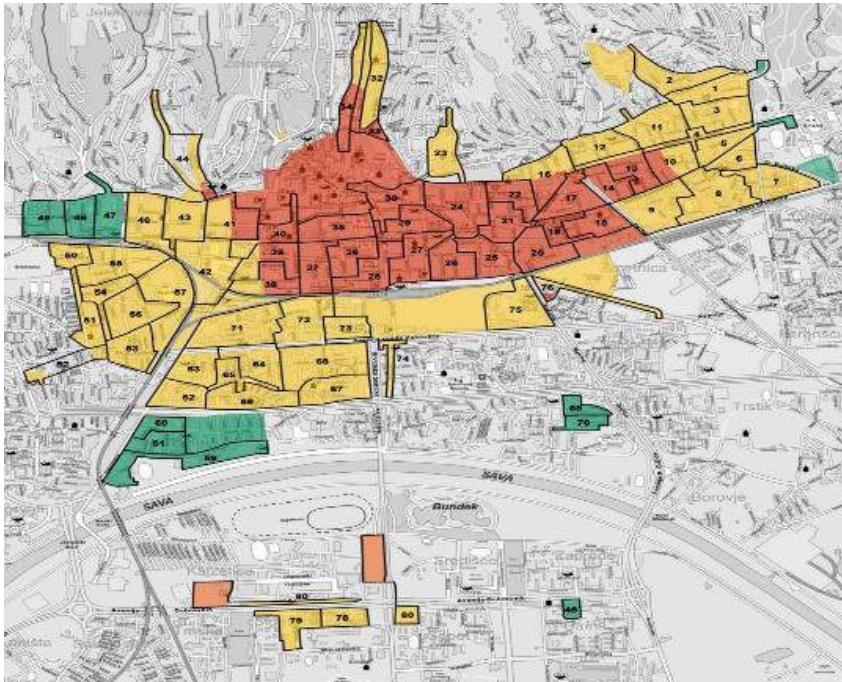

- Modal distribution in favor of motorized traffic
- Continuous increase in the degree of motorization over two decades
- Continuous expansion of toll zones (congestion at the edge of the toll)
- **The price of parking is subject to frequent changes**
- **The owner of PPP from zone I can park for free in zone II and III ...**
- **More PPPs issued than parking spaces offered**
- Lack of Park and Ride parking
- Inefficient JGPP
- Spatial planning documentation subject to frequent changes
  - The 2003 GUP bans the construction of new public garages in the city's central area
  - GUP 2007. allows
  - GUP 2013 ban
  - GUP 2015 allows, with a review of possibilities and the adoption of criteria...
  - GUP 2017 allows with review of possibilities and adoption of criteria...
  - GUP ????

# Broj parkirnih mjestra i izdanih povlaštenih parkirnih karata, 2015.

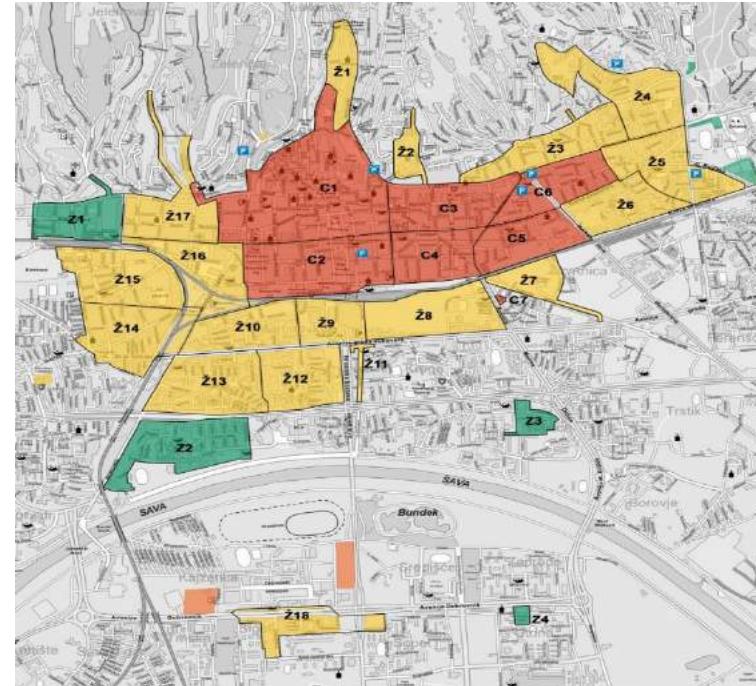

- Usporedba – PGM - PPK

# Prijedlog rješenja

**Manji PPK kvartovi**

**Veći PPK kvartovi**

# Conclusion

- The City of Zagreb needs to make an in-depth traffic analysis of the entire parking system with the aim of providing street parking for residents, while reducing street parking.
- It is desirable to provide short-term parking that contributes to economic and social activities in Zagreb.
- Among the first steps in controlling the total supply of parking is the establishment of neighborhood toll zones in which the supply and demand for parking spaces could be more precisely taken care of.
- As a long-term parking solution in the city center, it is proposed to evaluate the project of "block garages", mostly for the needs of tenants, but also for other users in the coverage area.
- Therefore, the conclusion is that the local government should be able to control both street and off-street parking supply in order to be able to pursue a consistent parking policy.

# Predmet studije

*Koncesija za održavanje i naplatu javnih uličnih i izvan-uličnih mesta za parkiranje za osobna vozila u Gradu Osijeku*

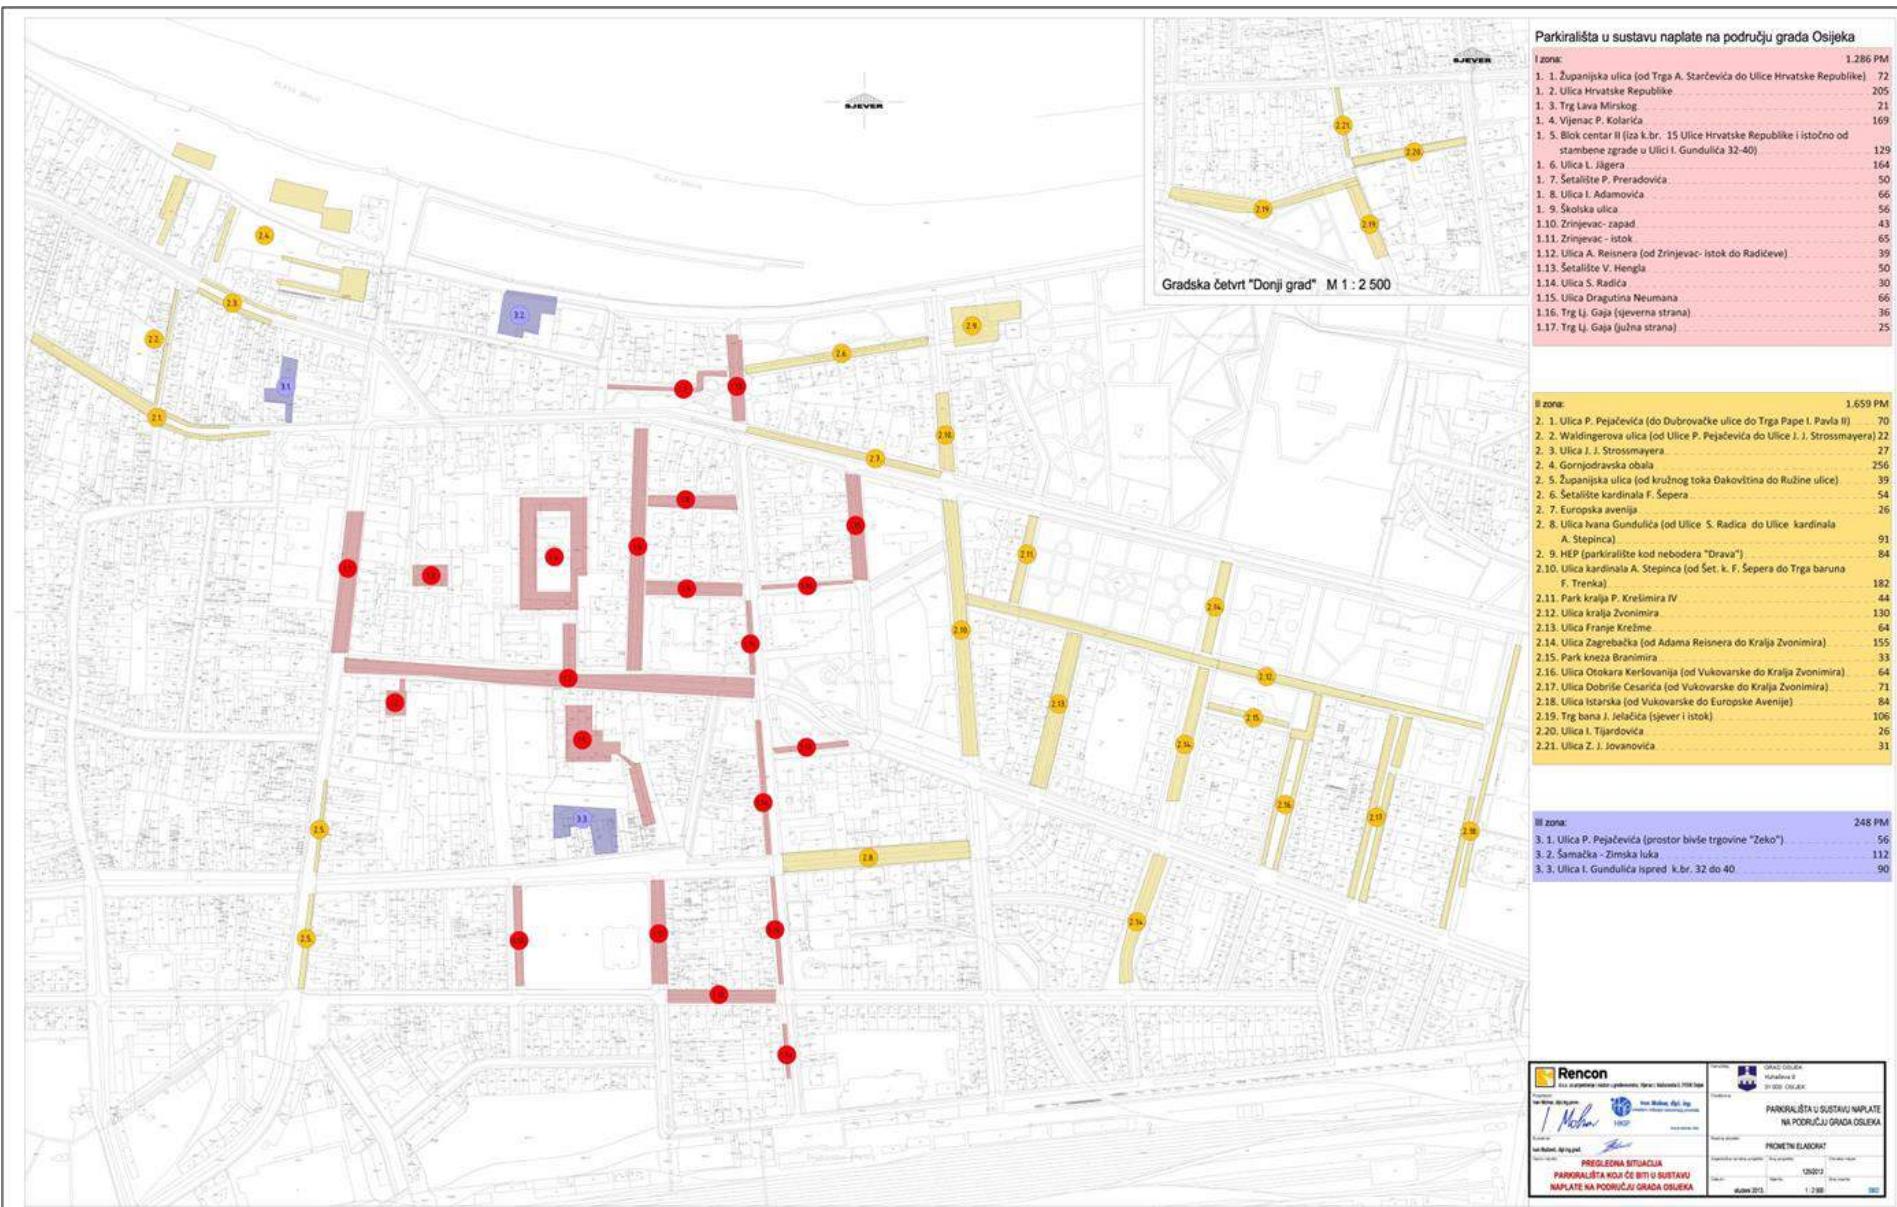

• 3.193 mesta za parkiranje

- 880 izvanulična
- 2.313 ulična

• 97 mesta za parkiranje za parkiranje za invalide

• Oko 51.000 m<sup>2</sup> parkirališnih površina

- 45.000 m<sup>2</sup> suvremenih zastora
- 6.000 m<sup>2</sup> makadam

# Cilj studije

*Prema analizi općeg dijela, tehničkoj analizi, finansijskoj i ekonomskoj analizi, studiji opravdanosti, pravnoj analizi, te lokalnim uvjetima utvrditi:*

- je li koncesija povojna varijanta za Grad Osijek,
- minimalnu godišnju koncesijsku naknadu,
- minimalne uvjete sposobnosti koncesionara,
- rok na koji se koncesija ustupa.

# Studija izrađena temeljem

- **Zakona o koncesijama**, NN br. 143/12.

# Načela i ciljevi naplate parkiranja

- Provođenje ukupne prometne politike
  - smanjenje upotrebe osobnih vozila, naročito za odlazak na posao,
  - povećanje udjela javnog prijevoza, pješačenja i korištenja bicikla, jer je ekološki, ekonomski, prostorno i energetski racionalno
- Regulacija i uvođenje reda u ponudu i potražnju za parkiranjem u zoni u kojoj se primjenjuje
- Regulacija socijalne nejednakosti na način da penalizira korisnike pri korištenju osobnog vozila
- Ekomska korist za ukupnu društvenu zajednicu sredstva se mogu ulagati u druge djelatnosti

# Procjena vrijednosti koncesije

## *Ulazni parametri*

- Prometno - tehnički elementi parkirališta
- Parametri naplate parkiranja u drugim gradovima u RH
- Parametri naplate parkiranja u Osijeku
- Proračun investicije za funkcionalna rad parkirališta
- Plan prihoda i rashoda
- Analiza dobiti parkirališta u uvjetima „nekoncesije”
- Korisnost koncesije u odnosu na davatelja koncesije

Tablica 1. Prikaz prosječnih cijena uličnog parkiranja po parkirnim zonama u nekim hrvatskim gradovima u 2013. godini

Red. br.	GRADOVI	ZONA 1 (u kn)	ZONA 2 (u kn)	ZONA 3 (u kn)	ZONA 4 (u kn)	ZONA 5 (u kn)	PROSJEK (u kn)
1.	DUBROVNIK (sezona)	30,00	10,00	5,00	/	/	15,00

**CIJENE PARKIRANJA U 1. ZONI:**

Ukupan broj uličnih parkirnih mjesta (PM) u 1. zoni:

- 1.286 PM (stanje na dan 1. siječnja 2015. godine)

Vrijeme naplate parkiranja:

- radnim danom ..... 7,00 - 20,00 sati
- subotom ..... 7,00 - 15,00 sati
- nedjeljom i praznikom parkiranje se ne naplaćuje

Cijena jednog sata parkiranja ..... 4,00 kn

Povlaštene mjesecne karte:

- za stanare ..... 50,00 kn
- za pravne osobe ..... 275,00 kn

Komercijalne parkirne karte ..... 200,00 kn

Dnevna parkirna karta ..... 72,00 kn

**CIJENE PARKIRANJA U 2. ZONI:**

Ukupan broj uličnih parkirnih mjesta (PM) u 2. zoni:

- 1.659 PM (stanje na dan 1. siječnja 2015. godine)

Vrijeme naplate parkiranja:

- radnim danom ..... 7,00 - 20,00 sati
- subotom ..... 7,00 - 15,00 sati
- nedjeljom i praznikom parkiranje se ne naplaćuje

Cijena jednog sata parkiranja ..... 3,00 kn

Povlaštene mjesecne karte:

- za stanare ..... 50,00 kn
- za pravne osobe ..... 275,00 kn

Komercijalne parkirne karte ..... 200,00 kn

Dnevna parkirna karta ..... 59,00 kn

**CIJENE PARKIRANJA U 3. ZONI:**

Ukupan broj uličnih parkirnih mjesta (PM) u 3. zoni:

- 248 PM (stanje na dan 1. siječnja 2015. godine)

Vrijeme naplate parkiranja:

- radnim danom ..... 7,00 - 20,00 sati
- subotom ..... 7,00 - 15,00 sati
- nedjeljom i praznikom parkiranje se ne naplaćuje

Cijena jednog sata parkiranja ..... 2,00 kn

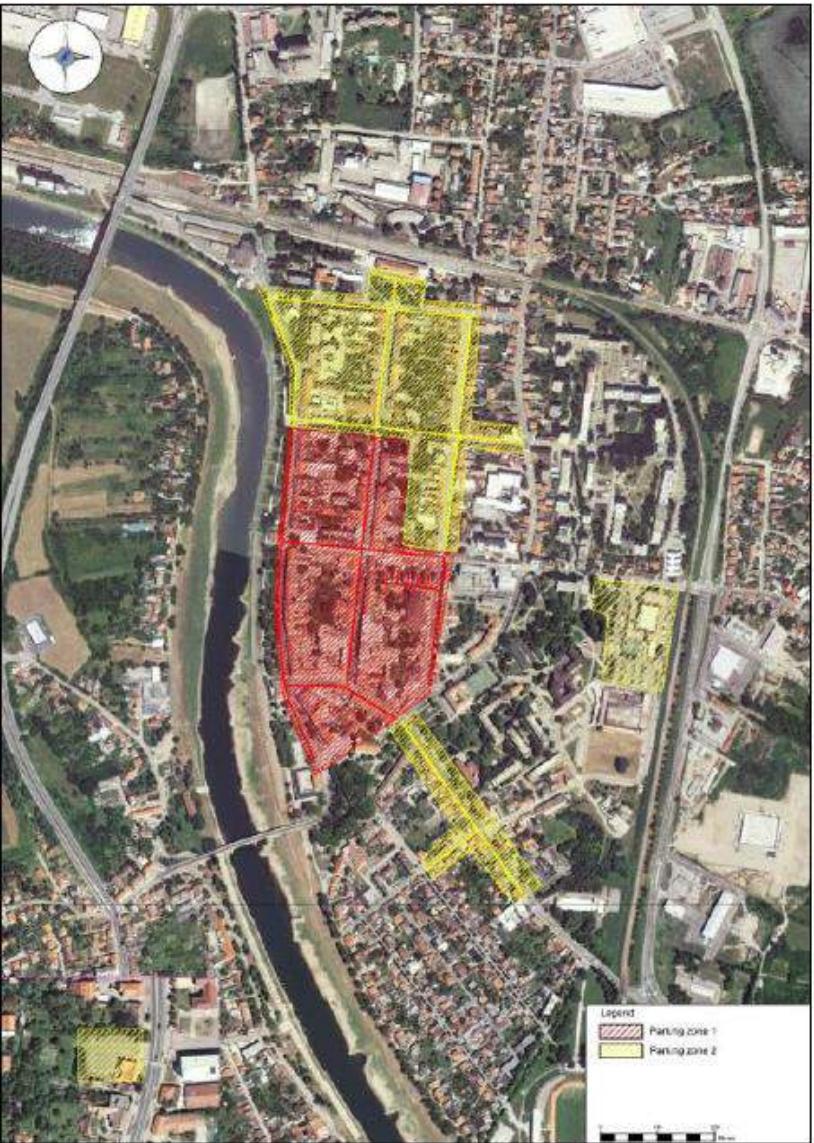

Povlaštene mjesecne karte:

- za stanare ..... 20,00 kn
- za pravne osobe ..... 137,50 kn

Komercijalne parkirne karte ..... 100,00 kn

Dnevna parkirna karta ..... 46,00 kn
