Federal Ministry  
for Economic Affairs  
and Climate Action

# Mobility (travel) plan

is a long-term management strategy employed by an organisation to promote more sustainable transport amongst staff, visitors and deliveries to its site. This can simultaneously bring about a number of benefits such as:

# Reduction in CO2 emissions

## Climate

Novartis is committed to using resources efficiently and reducing greenhouse gas (GHG) emissions, which affect the climate. Our ambition is to make the company both energy and climate resilient.

### 2025

**Become carbon neutral in our own operations (Scope 1 and 2)**

### 2030

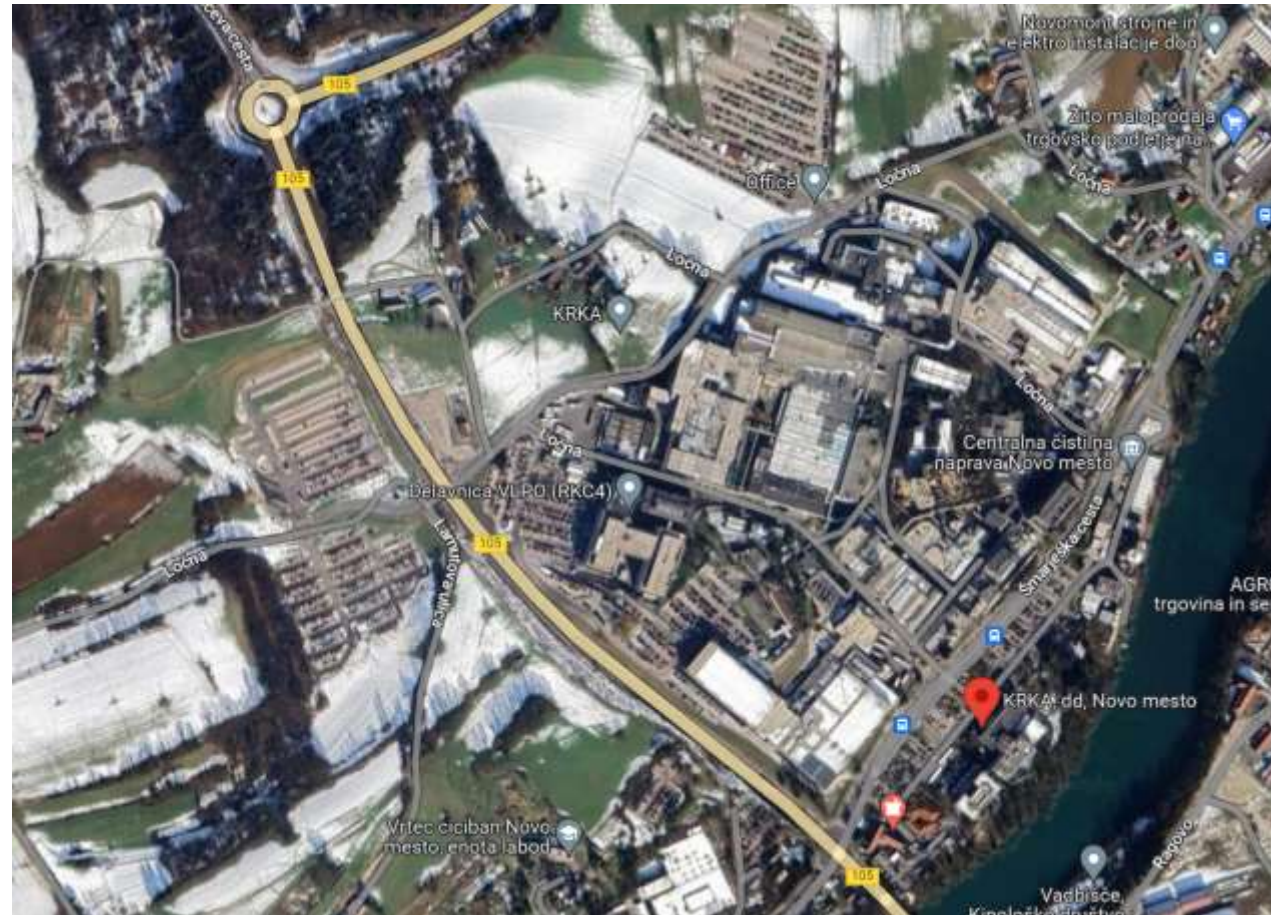

**Achieve carbon neutrality across our supply chain (Scope 1, 2 and 3)**

Our strategy is consistent with limiting global warming to 1.5°C above pre-industrial levels. Within the scope of this commitment, we have joined the [Business Ambition for 1.5°C](#) and have also become part of [Race to Zero](#), the UN-backed campaign led by the High-Level Champions for Climate Action. We are committed to achieving net zero by 2040 and are in the process of aligning our strategy and targets to the new Science Based Targets (SBT) Net Zero Standard published in October 2021.

# Cost savings

# Reduced congestion

# Improved health

# Improved parking conditions

# Improved access
